- Type of company or sector
- Function or cargo occupied
- Main activities and responsibilities
  - Bottling of Natural Water
  - Quality Control
  - Chemical and bacterial analysis to guaranty the quality of final product

#### PROFISSIONAL TRAINING

---

- Dates (Nov 2014 – Dez 2014)
- Name of university or institution
  - Training in valorisation of technologies  
INOVA+
- Dates (Oct 2007 – Mar 2008)
- Name of university or institution
  - Postgraduate program “Synthesis, properties and applications of polymers” by Prof. Alessandro Gandini  
IDPoR, Research and Development of Polymers from Renewable Resources
- Dates (Nov 2006 – Mar 2007)
- Name of university or institution
  - Postgraduate program “Colloids, Surfaces and Interfaces” by Prof. Alessandro Gandini  
IDPoR, Research and Development of Polymers from Renewable Resources
- Dates (March 2004– May 2004)
- Name of university or institution
  - Initial Pedagogic Training for Trainers  
CRISFORM (Professional Training Centre for Crystal-wear sector)  
Final average 16 (0-20)
- Dates (Sept 2003 – Octr 2004)
- Name of university or institution
  - Training in Hygiene and Labour Security through  
EPAMG (Professional and Artistic School from Marinha Grande)
- Dates (Sep 2003 – Oct 2004)
- Name of university or institution
  - Training in Quality Management  
CTCV (Technological Centre of Ceramics and Glass – Coimbra)  
EXERTUS (Advising Company)  
CTCV (Technological Centre of Ceramics and Glass – Coimbra)
- Dates (Sep 2003 – Oct 2004)
- Name of university or institution
  - Training in Hygiene and Labour Security through  
EPAMG (Professional and Artistic School from Marinha Grande)

#### EDUCATION AND TRAINING

---

- Dates (Sep 2008 – Oct 2012)
- Name of university or institution
  - Final theses
    - PhD
    - University of Aveiro (Portugal)- Mechanical Engineering Department
    - Poly(methyl methacrylate) / Hydroxyapatite / Nano-phase: A nanocomposite material for biomedical applications
- Dates (Oct 2005 – Dec 2007)
- Name of university or institution
  - Final theses
    - EMMS, Joint European Master's Programme in Materials Science
    - University of Aveiro (Portugal), Hamburg University of Technology (Germany), Aalborg University (Denmark)
    - Synthesis and characterization of TiO<sub>2</sub>/cellulose nanocomposites
- Dates (Oct 1998 – Sep 2003)
- Name of university or institution
  - Final Project
  - Final classification
    - Degree in Management and Industrial Chemistry
    - University of Aveiro
    - Oxidation with Supported Metaloporphyrins.
    - Final average 14 (0-20)

**PERSONAL SKILLS**

Mother tongue(s) Portuguese

Other language(s)	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken interaction	Spoken production	
English	B1	B1	B1	B1	B1

Replace with name of language certificate. Enter level if known.

Levels: A1/2: Basic user - B1/2: Independent user - C1/2 Proficient user  
Common European Framework of Reference for Languages

Communication skills ▪ good communication skills gained through my experience on oral presentations and communication with other scientists

Research interests My current research is focused on development of novel graphene based nanocomposite materials, specifically on the synthesis, characterization and the study of their properties. The main application fields are:

- Graphene based porous structures for heterogeneous catalysis (**Catalysis**)
- Graphene foams for water purification (**Environment**)
- Three-dimensional graphene foam as a biocompatible and conductive scaffold for biomedical applications (**Biomaterials**)
- SERS active nanostructured substrates based on graphene for selective biomolecules detection and Graphene/Polymer composites for chemical and biological sensors (**Sensors**)
- Graphene Oxide nanoplates development for detection and therapy of cancer cells and tumours (**Therapeutic agent**)
- Hydrogen Storage in Graphene-Based Materials (**Energy**)

Computer skills ▪ good command of Microsoft Office™ tools  
▪ chemical and mechanical software

Driving licence ▪ B

## Projects

European Project - Sustainpack (Innovation and sustainable development in the fibre based packaging value chain). (2005 - 2007)

Nanotechnology for next generation biomedical implants. Subject: Nanomedicine. NANO/NMed-AT/0115/2007. Funded by INL-Portugal/Spain International Nanotechnology Laboratory. (2007-2011)

Biomaterials for regenerative medicine. QREN, programme Mais Centro-Programa Operacional Regional do Centro and União Europeia/ Fundo Europeu de Desenvolvimento Regional (CENTRO-07-ST24-FEDER-002030).

Projecto em co-promoção C-TEC - Moldação de Componentes Técnicos em Compósito de Matriz Polimérica Reforçada com Celulose.

Development of ultra-sensitive nanotherapeutic anticancer agents for boron neutron capture therapy, NANOTER (2016-2018). Funded by the European Commission H2020.

## Students Supervision

Maryam Salimian – Thesis Project: Enhancement of hydrogen storage in graphene based nanocomposite by hydrogen spillover, PhD grant: SFRH/BD/98337/2013

## Editorial board

Editorial Board Member of Scientific Reports: Nature Publishing Group.

Honours and awards

Marie Skłodowska-Curie Individual Fellowship (2016)
